"20 Biggest Mistakes Principals Make and How to Avoid Them" is specifically designed for principals as a means of reflecting on their personal behaviour and experiences as principal. The mistakes reported in this book reflect a collection of conversations with teachers, administrators, and the author's own personal experiences as both a teacher and a principal. The scenarios concern mistakes that a principal can and should avoid, and suggests strategies for avoiding some of the mistakes other principals have made. The book divides these mistakes into six categories: People Skills, People, Principal, Job, Tasks, Personal Issues, and Fatal Attractions. Each of these scenarios is designed to illustrate the mistakes that can occur in each area.
