Review

"Although largely forgotten now, the French writer Albert Robida was a pioneer of science fiction. ... (H)is 1882 roman d'anticipation *The Twentieth Century* (is) a funny, sometimes cynical, frequently prophetic soap opera about a young woman who embarks upon a career search in the future worlds of 1952, gets caught up in a revolutionary struggle, and winds up having a brand-new continent named after her...."--Joshua Glenn, *Boston Sunday Globe*

Review

"*The Twentieth Century* is the literary equivalent of discovering King Tut's tomb and marveling that such wonderful things were there for all these years but concealed. Wesleyan's edition will allow us to see at last one of France's hidden treasures." (Paul Alkon, Professor of English, University of Southern California)
