In *Reshaping the Frontier Landscape: Dongchuan in Eighteenth-century Southwest China*, Fei HUANG examines the process of reshaping the landscape of Dongchuan, a remote frontier city in Southwest China in the eighteenth century. Rich copper deposits transformed Dongchuan into one of the key outposts of the Qing dynasty, a nexus of encounters between various groups competing for power and space. The frontier landscape bears silent witness to the changes in its people's daily lives and in their memories and imaginations. The literati, officials, itinerant merchants, commoners and the indigenous people who lived there shaped and reshaped the local landscape by their physical efforts and cultural representations. This book demonstrates how multiple landscape experiences developed among various people in dependencies, conflicts and negotiations in the imperial frontier.

评论

丑媳妇总要见公婆

能很好地把各種故事都串在一個landscape下面講，整本書很緊湊。敘述中老是用被動語態有些不適應。

昨天见到了本尊，很棒的研究！
