Berlin, 1945. Dr Victor Schiller is conducting experiments in genetic manipulation with the intention of helping humanity. But when he starts to fear that the technology he has invented may instead breed a race of super-killers, he escapes and vows to destroy his human test subjects -and their offspring. New York, 1973. Dr Schiller is now living in New York under an assumed name and using his status as a famed physician to find the last human targets on his list. Including Alana Marks. A young woman haunted by dreams of her mother's Nazi internment, Alana has no idea why she suffers from these ongoing nightmares, nor that a modern-day mad scientist is hunting her down...
