An uproarious work of social satire by Tonya Lewis Lee and Crystal McCrary Anthony, who give us an exclusive peek into the world of super-rich, super-connected African Americans. Lauren is trying to be an independent woman by starting her own documentary film company, but it's difficult when you're married to Ed Thomas, one of the wealthiest African-American businessmen in the country -- particularly when he seems to have a roving eye. Manny is an up-and-coming gay real estate agent who arrived in Manhattan from Alabama with only the clothes on his back. He's made his way to the top of his profession -- yet he still wants more and is intent on charming his way into riches to keep his gorgeous live-in boyfriend happy. Tandy is one of the powerful "ladies who lunch" until her husband's death reveals his shocking financial problems. Now, she's desperate to reinvent herself and must find a new source of money. In this compelling first novel, authors Tonya Lewis Lee and Crystal McCrary Anthony give us a rare glimpse inside the fashionable and urbane world of New York's

chic African-American society and its incumbent scandals, foibles, and skeletons. Gotham Diaries is a gripping novel, filled with fascinating characters and a plot that won't let go.
