isbn:9780452285606

As an adult, Lucy Greene lives hard and slips the clutches of any emotional commitment. She’s an incredibly appealing young woman who wields a bone-dry sense of humor as a shield and promiscuity as a weapon. But when she arrives in overheated Florida to take care of her cancer- stricken mother, Lucy finds herself in strange new emotional territory that can only be understood by a frank assessment of the past. Lucy unfolds the painful memories of her childhood—including a freak accident that occurred one fateful summer at the family lake house, after which her father seemingly disappeared and her mother moved forward on a very different course. Amid bitterness, self-doubt, and exasperation, it is Lucy’s one treasured memory—a midnight swim with her mother—that reminds her there is grace in her graceless world, a fact that helps her to forgive her mother and, ultimately, let her go. Uplifting but unsentimental, compelling and remarkably moving, *Swimming Naked* is an unforgettable debut that will resonate with daughters, mothers, and anyone who’s ever searched her past in the hopes of finding a future.
