Lucy's twin brother is missing, an art thief is on the loose, and her hormones are on full tilt. How is she going to save her brother, and catch a thief when all she can think about is how her hormones go into overdrive whenever Agent Garrett is close to her? That is exactly what she has to do in this suspenseful romance set in locals from New York to tropical Colombia. Lucy Montgomery and Kevin Garrett are part of an underground law enforcement agency called F.I.U.W.- Forced Intelligence of the United World. Lucy's twin Chase, who also works for F.I.U.W., disappears while working on a case involving art theft from international museums. Lucy is determined to find her brother and the thieves who kidnapped him. Her boss assigns her to a team of operatives and fails to mention that he has involved Kevin, her ex-teammate and longtime rival. Kevin's sudden appearance brings back feelings Lucy is unprepared to deal with in the face of losing her brother. Everything seems to fall to pieces when they learn the thieves they are dealing with are much more than they appear.
