Moveable beads -- a staple in every nursery -- are ingeniously incorporated into a charming board book to create Move-Along Bead Books. On each spread, the reader is instructed to move one or more beads to the opposite side of the plastic hoop to reinforce early development skills, such as eye-hand coordination, visual tracking, and object identification. The plastic hoop is securely embedded into the back of the book and meets all safety requirements. Babies will love moving the large beads all by themselves as they "read" the story. In Sleepytime Farm, just before bedtime the moon invites the baby animals to play. Kids follow along by moving the bead that matches the animal in each picture. Format: Books with Toys Dimensions (inches): 5 1/2 x 9
