isbn:9781883220938

From the Aspen to the Yew, the native trees of North America have given us food, shelter and an important part of our heritage. Naturalist-illustrator Diane Iverson's book is both useful and fun. It captures a sweet intimacy, as well as the most interesting facts about 27 major trees and their relatives, including their vital statistics, dependant wildlife, and the part they played in the lives of the Native Americans and the Colonists. Diane Iverson is a wildlife artist and a grandma who has never outgrown splashing in puddles and climbing trees.
