This unique text is a practical guide for educators who want to maximize their effectiveness in the classroom. Impact Teaching stresses the importance of teachers creating the maximum impact on their students in the limited time they have available.

It also covers the skills, techniques, and concepts classroom teachers can use to have more impact on their students. It addresses the global picture, including Crest of the Wave and Framing. It also focuses on smaller, high priority details, such as Question-Detail-Question, Vocal Italics, and Specify the Response. While broad in range, each idea is presented through the use of practical, real-life examples, making it a user-friendly text.
