The "Guide to Teaching Strings" is a comprehensive text designed to provide the instrumental music teacher with an introduction to the history, repertoire, and performance practice of each of the strings. For each of the strings, "The Guide"

provides a brief history of the instrument, bow, case, and accessories. It furnishes criteria for the selection of instruments and techniques for performance, with teaching procedures for each of the four instrument groups from the initial training of the beginner through the performance practice of the accomplished student. In sum, "The Guide" is a strings methods text that will serve teachers and performers throughout their careers.
