Make the most of your child's extraordinary learning potential with this collection of brain-boosting games for toddlers to fives. Discovering new things with your child is fun and exciting for you both and even the simplest activities can be used to introduce new concepts. Research shows that children who have a nurturing environment, where they are encouraged to learn through play, often have higher IQ scores and adjust more easily to school; children who listen to music with structured melodic patterns improve their abilities in complex reasoning tasks and mathematics. Introduce your child through play to patterns and sequences and simple problem solving with more than 300 easy, fun-filled ideas including word and music games that even tiny tots can enjoy. Keep preschoolers entertained with counting, weighing and measuring, matching and sorting while the experts explain how each activity promotes brain development and learning skills.
