If you are looking for unique and different names, this is your one-stop resource. Some of the names will roll off your tongue, some bounce, some even tap dance. The author encourages us to, "Try thinking of a name as a dash of color that you give to the world; a way to leave your mark, like an elaborate scarf wound through auburn hair or a periwinkle, paisley tie that everyone admires." With over 1000 names, complete with usage examples, readers seeking a non-traditional first or middle name can bet there won't be five others in the class bearing the same name.
