Replacing the highly-acclaimed first edition, this second, newly-researched, fully-revised, expanded and updated edition now includes details of 29 major University centres and their Institutions of Higher Education. It takes full advantage of the recent technological revolution, highlighting a whole range of internet sites for job opportunities, course registration, accommodation, tourism and leisure. The practical help and advice are based on the authors' many years of experience as year abroad tutors at the University of Birmingham. Whether spending a few weeks on a vacation course or a half- or a full year in academic study, or as an English assistant or on a work experience placement, the visiting student and, doubtless many a parent, will draw considerable comfort from the information and advice contained within these pages.
