100% Information Literacy Success is the fourth text in the 100% Success series, and serves as a guide to the information literacy standards as described by the American Library Association. This text instructs students and professionals on developing crucial information skills to succeed in today's academic and professional environments. 100% Information Literacy Success is designed for use as both a comprehensive textbook as well as an easily accessible reference supporting readers

beyond the classroom. Using hands-on learning activities and real-world applications, the text teaches readers how to determine the nature and extent of information needed to solve a problem, how to access the information effectively, how to evaluate the information found, how to use the information for a specific purpose, and how to effectively and legally communicate the information. Features of the text include critical thinking exercises, reflection questions, hints, and step-by-step research guidance- all of which help students understand and apply crucial skills while becoming comfortable with independent research and effective presentation methods. The 100% Information Literacy Success text is accompanied by an online companion, which contains student practice exercises, web resources, and tips for developing effective written documents and presentations. Instructor resources include lesson plans, quizzes, and power point presentations for each chapter.
