出版时间:2007-1

装帧:HRD

isbn:9781402732249

John Drieman, the former publisher of "Best Kitchens and Baths" magazine, has teamed up with renowned interior photographer Nancy Elizabeth Hill to write the first truly different kitchen design book of the 21st Century. This copiously illustrated, forward-looking guide captures all the groundbreaking changes in the way we think of,

and use, this important room. These kitchens are bigger, often incorporated into a family's main living space, and include a multitude of distinct work centers. Drieman explains exactly how to create such a room, with advice on planning and budget; adding the latest appliances, countertops, and cabinetry; and making the space seem either bigger or cozier. The book's entire second half takes readers on a photographic tour of 20 unique kitchens ranging from country casual to high tech.
