著者:Mori, Joyce

出版者:Collector Books

出版时间:

装帧:Pap

isbn:9781574328936

Trace your family heritage or memorialize a vacation to an exotic locale with this dynamic collection of quilting designs. Inspired by world-wide civilizations of the past and present, both angular and flowing quilting motifs feature an abundance of unique

cultural flair. A doctor in anthropology and an experienced designer of quilting patterns, Joyce Mori combines these two passions to transform interesting objects into patterns for your original quilts. The motifs are inspired by a fascinating array of sources from 20,000 BC to the twentieth century, such as an Egyptian mummy case, marble floors of Venetian churches, Native American stamped pottery, a dyed moose hair design on Canadian moccasins, a South Carolina wrought iron railing, an Eskimo wood mask, and Australian aboriginal art. A few continuous-line designs have been included for longarm machine quilters. Some designs can be adapted to redwork-type embroidery and hand or machine applique. Some can even be scanned into your computer, then converted to machine embroidery motifs.
