A follow-up to the successful "Impatient Beader", this fun and sassy guide gives beginning beaders the guidance and groundwork they need to create beaded designs of their own. Drawing inspiration from the world of every day objects, including vintage

postcards, 1950s aprons, and silk scarves, Margot Potter teaches readers the basics of design in a completely nonthreatening way. Not only will readers find step-by-step instructions for great projects, but they'll get a peek into the design process.
