With this book, readers will make something cool without spending a ton of money. With step-by-step photos readers will make the projects in this book and learn basic skills along the way. Unlike other titles that focus only on t-shirts or sweater projects, this book offers something for everyone, from head to toe, with a wide range of

projects such as handbags, leathercraft, hats, painted shoes and more. In no time readers will find themselves covering cheap shoes in trendy fabric, making felted sweater Chanel-style quilted hoodies and creating their own personalised DIY fashions.
