Designer Style Jewelry shows readers how to make stunning gallery-quality jewellery with easy-to-use and readily available material. Each chapter features the latest techniques for working with a different medium. Throughout the book are fresh, sophisticated projects for earrings, necklaces, pendants, pins, bracelets, and rings. The

designs range in style from updated classics like the Victorian portrait pendants (made with shrink plastic and an ink-jet printer!) to retro favourites like the 1970s crocheted rings and necklaces. Instructions on how to finish projects by combining them with purchased findings are also included.
