出版时间:2005-01-31

装帧:Library Binding

isbn:9781404202740

This series is a fun and engaging look at some of Hollywood's and the world's most beloved movie monsters. Each title in the series begins with a retelling of the original tale and includes pictures from the movie. Next, each book tells of the making of the movie, revealing secrets, stories, and little-known facts. The author of each book also explores the journey each monster took to arrive on the silver screen. Some were born of legend and others from literature, but each monster profiled in this series is a classic creature who holds a special place in the American collective. Popular on the silver screen and defeated by the silver bullet, werewolves have been a movie favorite for decades. This fun, fact-filled book begins with a retelling of the movie, then takes the reader behind the scenes, and finally goes back a few hundred years to learn the inspiration for the film.
