In 1897, famed explorer Robert Peary took six Eskimos from their homes in Greenland to be "presented" to the American Museum of Natural History. Among the six were a father and a son. Soon, four were dead, including the father (whose bones, unbeknownst to the son, were put on display). One returned to Greenland. And the other -- the young boy -- remained, the only Eskimo in New York for twelve years. His name was Minik. This is his story. A story of lies and deceptions. A story about the price of exploration. A story about discovering the truth of a culture.
