装帧:Hardcover

isbn:9780792272984

How did dinosaurs get feathers? How did they start flying? What use were feathers to dinosaurs that didn't fly? Chris Sloan's 2000 book Feathered Dinosaurs introduced kids to the radical idea that some dinosaurs had feathers and that birds are, in fact, a subset of dinosaurs. In How Dinosaurs Took Flight, Sloan returns to these ancient feathered creatures to introduce kids to the fascinating new finds—including a

Tyrannosaur with feathers and a dinosaur with not just two but four wings. The author focuses on the tough new questions scientists are asking right now, the evidence they've gathered, the hypotheses that are developing from the evidence, and the unknowns that remain. This book will be the most up-to-date children's book on this topic on the market.

作者介绍:

作者克里斯托夫·斯隆，美国《国家地理》杂志的古生物专家和资深编辑，拥有对国家地理学会研究发现的恐龙化石进行优先观察的权利。他采访了在野外考察及在实验室工作的古生物学家们，和他们一起工作，并将科学家们的发现发表在《国家地理》杂志上和书本上，将最新知识带给广大的青少年们。斯隆非常热衷于制作恐龙插画，并产生了用计算机将恐龙复原的想法，在本书中读者可欣赏到很多精彩的图片。
