isbn:9780531175767

Presented in an easy-to-read format and filled with tips, hints, and suggestions, this guide helps students write inventive, distinctive essays. The first section of the guide looks at the process of writing essays and offers creative alternatives for students to follow instead of taking the beaten path. The second segment offers chapters that focus project-specific solutions and suggestions, such as writing a descriptive essay or a process essay. A "To Find Out More" section is also included to guide students to additional resources.
