Dr. Mortimer Gross and the kids of the Hurlbutt Elementary after-school learning lab are back with new math and word problems!

But don't worry, they haven't cleaned up their act one bit, so you won't be bored with

trains, planes, or cute little kitty cats. This workbook is full of just as many burps, farts, boogers, and other bodily functions as the first one! But it's all in the name of education: While you're having a good time, you'll be learning something too! (Mom and Dad will like that!)

Here are 140 of his best games, puzzles, and problems. Learning has never been so much fun!
