This adorable board book gives parents and their young children a whole new way to communicate--through fun and easy-to-learn signs. With this book, babies as young as six months will be able to express simple words and concepts through signing--even before they can talk! This is a great book for all babies and preschoolers, not just for the hearing-impaired. If baby wants to say Mommy or Daddy, or needs to tell you it's time to play or to cuddle-- this book will give you and your baby a chance to learn a rich new language you'll use every day.
