Do you know the story of Michael Collins, the Apollo 11 astronaut who went all the way to the moon but never walked on its surface? Instead, he orbited the moon 14 times, surrounded by 701 power switches and 20 pounds of checklists. Reminiscent of a scrapbook, this extraordinary book chronicles what Michael Collins did, saw, and

thought about in space. Through fascinating facts, quotes, checklists, original drawings, and photos taken both in space and on Earth, it also tells how the astronauts prepared for their historic journey, what they brought with them, and what they left behind.
