Help! A mad scientist has unleashed a throng of deadly robots on the world--and only by joining the characters and solving every one of these science-based puzzles can kids stop the destruction and save humanity. Learning about anatomy, astronomy, nature, secret codes, and more becomes a delightfully challenging game when these scientific subjects are woven into a thrilling and stylishly illustrated story. There's art throughout, created in a cool 1950's sci-fi style, and each puzzle focuses on a different topic. Through crosswords and riddles, word games and word searches, all kinds of fascinating facts emerge. Best of all, on the last page a "grand finale" uses all the solutions from other puzzles in the book.
