Books for the smallest room in the house...that generate BIG sales.

The Sit & Solve series has been a runaway success, but up till now, kids have been locked out of the fun. That’s not fair—so something’s been done about it. Youngsters can delight in bathroom books made just for them, with more colorful covers, puzzles geared to their level, and age-appropriate humor. Six-to ten-year olds can take their choice of four: a collection of jokes that will surely have them laughing, optical illusions, mysteries to intrigue the mind, and word searches to exercise the brain.
