Each book in this series offers all the statutes, legal opinions, and studies a student needs to structure a cohesive argument on a given controversial topic. Issues are presented from multiple points of view; sidebars cite law and opinions to aid in critical analysis; paratextual questions encourage reader engagement; and all sources are fully documented and grouped by the side of the argument. Discusses mental illness as a social problem: To what extent should persons with mental illness be contained in order to protect society? Can society afford not to bear the cost of treatment?
