著者:Fred H. Harrington

出版者:Powerkids Pr

出版时间:2002-8

装帧:Library Binding

isbn:9780823957644

This series, written by experts in their field, offers an in-depth introduction to the biology, physiology, and social structures of these amazing and oftentimes extremely rare canids. Students will also learn some of the basic concepts of ecology as they relate to concepts of habitats, food chains, and interdependence, and the importance of species diversity.
