Featuring an extra-sturdy library binding! Here is a spectacular and informative guide to the fascinating world of elephants. Superb color photographs of Asian and African elephants, their living relatives and reconstructions of their ancestors offer a unique "eyewitness" view of these remarkable animals, their natural history and relationship with people. See the adult "tusker", inside an elephant's mouth, a baby elephant feeding, an elephant in a threatening posture, elephants at work, and an elephant painting a picture. Learn how to tell an African from an Asian elephant at a glance, why elephants are worshipped, how long an elephant's tusks can grow, how elephants "talk" to each other, and why the future of elephants is threatened. Discover why elephants walk on their tiptoes, how much food an adult elephant eats in a day, the cruelty of the ivory trade, why elephants flap their ears, what an elephant does to keep cool, how intelligent elephants are, and much, much more.
