From excavating the burial grounds of ancient kings to creating robots in high-tech labs, the realm of science offers exciting career options for kids drawn to exploring how our world functions. Newly redesigned and completely updated, *Career Ideas for Kids Who Like Science, Second Edition* guides young readers through a variety of job possibilities. Step-by-step self-assessment allows kids to identify their unique traits and then connect them to viable career options in science. Informative and updated job profiles cover all the basics and spotlight real scientists working in their respective

research areas. The career discovery activities have been expanded to include all the latest developments on careers in science, giving kids an engaging and informative vehicle to learn more about themselves and their interests.
