著者:David Aguilar

出版者:National Geographic Children's Books

出版时间:2007-10-09

装帧:Hardcover

isbn:9781426301704

This comprehensive reference book on space includes information on the Sun and each of the planets in our solar system, and then branches out to examine other galaxies. It includes the latest information on the formation of the Universe, space travel, and the possibility of life beyond Earth. Spectacular photographs from space

and specially commissioned artwork dazzle in the NGS tradition. Star charts, moon maps, helpful scientific diagrams, and a timeline of space research and exploration are all included. The text is fascinating, detailed, and easy to understand. Interviews and/or features on space scientists help provide the latest information and give the book a stamp of authority. It is fully vetted by some of the foremost experts in the field of astronomy.
