Young readers will wonder at the immensity and diversity of the planets in this new Pebble Plus series on the galaxy. Each book provides information on the unique characteristics of the planet, its relationship to the Sun and the Earth, and what it would be like to live on that planet if life were possible. Pebble Plus offers the same high-quality nonfiction topics and low reading levels as Pebble Books in an enlarged, graphically enhanced format. This series explores and supports the standard "The Physical Setting: The Universe," as required by Benchmarks for Science Literacy: Project 2061.
