Mental disorders are among the most prevalent sources of disease burden in the

world. Increasing recognition of this burden has led to an explosion of scientific research as well as widespread public attention. Understanding causes and consequences of mental health and mental disorders from the perspective of public health involves unique methods and concepts from many disciplines, including population-based surveys in a life course framework. Prevention and control of mental disorders involves design and execution of intervention trials to prevent disorder in individuals who are currently healthy, and to minimize future consequences for those with current disorder or a history of disorder. Interventions of this type are important because good mental health protects against onset of a variety of mental disorders, as well as being a valued outcome in itself. The complexity of the brain and its relationship to social life requires concepts, methods, and syntheses that are new for epidemiology and public health.

Public Mental Health provides a comprehensive introduction and reference for the public health approach to mental and behavioral disorders, and to promotion of mental health. The volume's chapter authors and coauthors are drawn from the internationally renowned faculty of the Department of Mental Health of the Johns Hopkins Bloomberg School of Public Health, a department uniquely positioned to create this important resource for researchers, students, and public health practitioners. The volume explicates the latest methodologies for studying the occurrence of mental disorders in populations and provides estimates of burden, cultural differences, natural history, and disparities between population subgroups. It includes reviews of genes as sources of risk for mental disorders, the occurrence of stresses and their timing over the life span, and crises and disasters as sources of risk. The book includes chapters on the structure and functioning of the mental health service system in the United States, and around the world, and a comprehensive review of population-based strategies of intervention to lower risk. A final chapter lays out a path for the evolution of public mental health in the future.

作者介绍:

William W. Eaton, PhD, is Sylvia and Harold Halpert Professor and Chair of the Department of Mental Health at the Johns Hopkins Bloomberg School of Public Health.

目录: SECTION I: THE NATURE OF MENTAL AND BEHAVIORAL DISORDERS

1. The Burden of Mental Disorders

William W. Eaton, Pierre Alexandre, O. Joseph Bienvenu, Diana Clarke, Silvia S. Martins, Gerald Nestadt, Benjamin Zablotzky

2. The Perspectives of Psychiatry: The Public Health Approach

Paul McHugh

3. Global Mental Health Issues: Culture and Psychopathology

Judith K. Bass, William W. Eaton, Sharon Abramowitz, Norman Sartorius

SECTION II: METHODS

4. Assessment of Distress, Disorder, Impairment and Need in the Population

William W. Eaton, Ramin Mojtabai, Elizabeth A. Stuart, Jeannie-Marie S. Leoutsakos, S. Janet Kuramoto

5. An Introduction to Quantitative Methods Especially Relevant for Public Mental Health

Elizabeth A. Stuart, Jeannie-Marie Sheppard Leoutsakos, Alden L. Gross, S. Janet Kuramoto, William W. Eaton

SECTION III: DESCRIPTIVE EPIDEMIOLOGY

6. The Population Dynamics of Mental Disorders

William W. Eaton, Pierre Alexandre, Ronald C. Kessler, Silvia S. Martins, Preben Bo Mortensen, George W. Rebok, Carla Storr, Kim Roth

7. The Relationship of Adult Mental Disorders to Race, Socioeconomic Status, Marital Status, and Urbanicity of Residence

Silvia S. Martins, Jean Ko, Sachiko Kuwabara, Diana Clarke, Pierre Alexandre, Peter Zandi, Tamar Mendelson, Preben Bo Mortensen, William W. Eaton

SECTION IV: MECHANISMS OF RISK

8. Genes as a Source of Risk for Mental Disorders

Peter P. Zandi, Brion Maher

9. Mental Disorders Across the Life Span and the Role of Executive Function Networks

Michelle C. Carlson, Dana Eldreth, Yi-Fang Chuang

10. Models of Stress and Adapting To Risk: A Life-Course, Developmental Perspective

Catherine P. Bradshaw, George W. Rebok, Benjamin Zablotzky, Lareina N. LaFlair, Tamar Mendelson, William W. Eaton

11. Adapting To Acute Crisis

Carla L. Storr, Melissa Azur, Judith K. Bass, Holly C. Wilcox

SECTION V: THE BEHAVIORAL HEALTH CARE SERVICE SYSTEM

12. Mental Health and the Law

Deborah Agus

13. American Mental Health Services: Perspective through Care Patterns for 100 Adults, With Aggregate Facility, Service and Cost Estimates

Ronald W. Manderscheid, Pierre Alexandre, Anita Everett, Phillip Leaf

14. Community and Public Mental Health Services in the US: History And Programs

Anita Everett, Su Yeon Lee

15. Pathways to Care: Need, Attitudes, Barriers

Ramin Mojtabai, William W. Eaton, Pallab K. Maulik

16. Mental Health Systems around The World

Shekhar Saxena, Judith Bass, Anita Everett, William Eaton, Atieh Novin

SECTION VI: PREVENTION AND THE FUTURE

17. The Logic and Practice of the Prevention of Mental Disorders

Tamar Mendelson, Elise T. Pas, Julie A. Leis, Catherine P. Bradshaw, George W. Rebok, Wallace Mandell

18. Progress Made, But Much More to Be Done

Phillip Leaf, Laysha Ostrow, Ronald W. Manderscheid, David L. Shern, William W. Eaton
