Get ready for the ultimate chiller - in China! What was supposed to be excitement in Paris turns to horror from the Himalayas, one of the Earth's most remote landscapes, when Shaggy and Scooby come face-to-frightening-face with a terror greater than free-falling thousands of feet -- the legendary Abominable Snowman! The gang must climb icy cliffs, race through ancient temples and venture into secret ice caves within Mount Everest to reach the hidden city of Shangri-La and crack the mystery behind the chilling snow monster before it has a chance to put Shaggy and Scooby on ice -- forever!
