Gecko is only a few inches tall, but that's still big enough to be a bully when there are smaller creatures around the house—like Mosquito and her insect friends. But Mosquito is tired of being chased and harassed by the greedy lizard. In *Gecko and Mosquito*, a new 32-page hardcover children's book from Watermark Publishing, Mosquito is the unlikely hero who saves the day and frees the household bugs from Gecko's tyranny with a clever plan. Gecko may be bigger, but he's definitely not smarter.

Told in rhyming verse, with a liberal sprinkling of Hawaiian words and a glossary, *Gecko and Mosquito* shows young readers how one brave little bug meets a very big challenge.
