Take a bunch of plastic beads and put them (artfully, of course) onto a pegboard. Get a grown-up to iron them together and - presto! Off pops a permanent piece of art. We love this classic activity-but all we could find on the market were tiny frustration-sized beads packaged with tiny pegboards. A kid-pleaser like this deserves something better. MELTY BEADS for instance. Packaged with 600 big beads that are friendly to little fingers, this book comes with a sturdy plastic pegboard and plenty of inspirational artwork. It's a complete, ready-to-peg package.
