Remember pop beads? Those beads that snap together, snap apart and can make necklaces perfect for fashion-frenzy dress-up parties? They're back! And they're better than before. We improved the look and feel of the basic beads and tossed in some animal-shaped beads for good measure. We paired them with an idea book where jewellery is just the beginning! Make necklaces, bracelets and chains, or spiders, sea stars and octopi. And the best thing? Popbeads are endlessly re-usable. Yesterday's dog is today's bracelet is tomorrow's millipede. It's all the pop of pop beads, plus the snap and crackle of Klutz.
