isbn:9780399242168

Hanne is the smallest, the quietest, and the youngest hen in Mem Pockets' henhouse, but when the hens learn that Mem might lose her farm, it is little Hanne who volunteers to go on a quest to save them all. If she can find all nine magical grains and eat them, legend says she will be able to lay three golden eggs. But there are many challenges and terrors along her path . . . can little Hanne face them all alone and get back in time to save the farm? From the creator of the beloved Gossie books, Hanne's Quest is a truly distinguished storybook that will quickly take its place among the very best illustrated fiction for children.
