Desert animals live in a hostile environment. Extreme heat, searing sun, and lack of water are just a few of the challenges they may face. Young readers will find this new series of books on desert animals a fascinating introduction to the lives of these

adoptable animals. This series explores and supports the standards under "The Living Environment: Diversity of Life, Heredity, Cells, Interdependence of Life, and Evolution of Life," as required by Benchmarks for Science Literacy: Project 2061.
