Fourteen templates with over 200 exercises per book provide a perfect opportunity for students to practice computation skills. Use them as extra practice for students who always finish first, as take-homes for meeting individual needs, and much more. To use

self-checks, students place the template on a sheet of paper and write their answers in the holes. To check, they turn the template over and place it on their answers. By correcting their own papers, kids learn from their mistakes and take pride in their successes. Motivating, interesting, and self-correcting -- what better way to drill and practice
