Now with a realistic farting sound every time you push the button! "There's a genuine structure and momentum to the enjoyably silly story. There's still much mining of the flatulent vein of humor, of course, and sound effects and stinky jokes will send young

listeners guffawing. . . This will be a high-flyer for very, very informal read aloud occasions or for jocular uncles looking for sure-fire routes to subversive popularity."  
--Recommended, Bulletin of the Center for Children's Books
