isbn:9781403986344

Written by a leading academic and a leading practitioner, this book aims to demystify the private equity investment process and provide a single source reference for anyone considering private equity as an investment class or a source of financing. It will provide an historical perspective on global private equity, a business system review of the industry and "how to" sections relating to investing in private equity targetting major institutional investors and entrepreneurs and buyout initiators.
