"Results Now For Nonprofits" introduces a quick, basic, and practical approach to strategic, operating, and governance planning called Results Now(R). This approach stresses the need for every organization's leadership to focus its energy on the organization's mission and vision. With a unified framework to guide the work of the organization, "Results Now For Nonprofits" uses a lightning-fast and inclusive workshop process that puts strategic, operating, and governance planning under one comprehensive plan that the board can pass in a single vote and the organization can then maintain as a regular part of its business throughout the year.
