Liquidity risk is the risk of loss arising from an inability to quickly realize asset value or obtain funding and can be damaging if not properly considered or actively managed. Lack of liquidity can lead to large losses in asset/liability portfolios and off balance sheet activities and in extreme cases can trigger financial distress and insolvency. "Liquidity Risk" is a comprehensive treatment of the topic focusing on the nature of the risk, problems that arise in asset and funding liquidity and mechanisms that can be developed to monitor, measure and control such risks.
