isbn:9780521833219

Innovation and technological change show different rates, types and trajectories depending on the sector in which they take place. Agents and institutions of a sector all exert a major influence on innovation. With contributions from nineteen experts in their field, this book proposes the framework of the 'sectoral systems of innovation' to analyse the innovation process, the factors affecting innovation, the relationship between innovation and industry dynamics, the changing boundaries and transformation of sectors, and the determinants of the international performance of firms and countries in different sectors. Innovation in a sector is considered to be affected by three groups of variables: knowledge and technologies; actors and networks; and institutions. In addition to the general framework, this book examines innovation in six major sectors in Europe including pharmaceuticals and biotechnology, telecommunications equipment and services, chemicals, software, machine tools and services.

其实我就做翻译的时候看过一章，括弧看的是英文版我还看不太懂括弧完了。

这大概是本论文集，深圳图书馆五楼有。只翻阅了 software 那个 sector 的分析，是很短的节选部分。在分析的末尾提到了 OpenSource 和 Linux，内容中规中矩。出版日期是 2004，其中引用了 2002 年的论文，可见还是比较新的。FOSS 现状和当时没有多大差异，软件行业也没有，软件开发总是逐渐进步的，要过很久才会体会到天翻地覆的变化。
