isbn:9780765614117

This is a book about the reality of place in America, the events and influences that led to the America we recognize today. It is a book about the growth of American cities and their suburbs during the twentieth century, about institutions and metropolitan governance, about real estate development and finance, about housing and the lack of it, about the emergence and perhaps the eventual debilitation of cities and suburbs alike. Incorporating the thinking of visionary city planners and land use economists, the author presents a lucid primer on the economics of land, its development and usage, and on how things actually get done in the real estate industry.
