出版者:Springer Verlag

出版时间:1998-3

装帧:Pap

isbn:9780387983547

This book provides a set of case studies that can supplement any business statistics text. Developed at the Wharton School at the University of Pennsylvania, it is used for the beginning statistics course for MBA students. The casebook provides the latest in data analysis techniques, and includes a discussion of JMP and Minitab commands.
